## HELIOS's update on the coronavirus (COVID-19) outbreak

All HELIOS production sites are currently running with only minor disruptions, despite many of our employees now working from home. Similarly, we are experiencing minimal disruptions to our raw material supplies. We are still increasing the inventories and doing our best to provide a high level of service for our customers. However, as the situation with the suppliers across the Europe and transport companies changes daily, please take into the consideration some delays in deliveries and longer waiting time. The same applies to the limited possibility to confirm orders since many countries within Europe as well CIS region are turning to border closures. The latest country closing its borders is Russia, starting March 30, 2020. In case there are some significant obstructions to our deliveries, we will keep you informed.

While ensuring uninterrupted flow of our operations, health and safety of our employees and other stakeholders is being our primary concern. All measures we have taken in the past weeks still apply.
